

Master of Arts in Global Affairs

Cybersecurity and Technology Policy - Online

The Cybersecurity and Technology Policy track combines technical and non-technical foundational courses necessary to understand cybersecurity, as well as emerging technologies and the broader policy implications in an increasingly interconnected world. The program includes courses in policy formation, computer sciences, law, ethics, business, and international relations, to cultivate a holistic understanding of one of the most important security trends in the 21st Century.

PROGRAM HIGHLIGHTS

- Online 2-year program
(No summer classes)
- Affordable tuition
- Financial aid and scholarships
- Locked-step cohort program
- Innovative Capstone projects
- Professional Development Seminars
- Career Development Services

Roya Gordon, Global Affairs '16
Cyber Threat Intelligence Consultant
Accenture

"The MA in Global Affairs program kick-started my career in cybersecurity. Global politics, foreign policy, and regional conflict are key to understanding what spurs cyber threat activity. I'm grateful for the knowledge the program has equipped me with to be successful in this field."
