CHOOSE FIU BUSINESS INFORMATION SYSTEMS

You probably deal with *technology* every day, but there is so much more to this exciting field than most people realize. With a major in *information systems* (IS), you can use your technical *skills* and background to help your organization solve business challenges and compete more *effectively*. You might be a systems analyst or the person who can explain the complexities of the company's *technologies* to your colleagues in other departments. You'll know how to apply *cybersecurity* best practices and risk management to help keep your company's data safe. You'll also learn the *analytic* skills needed to extract key data from company systems and the Internet.
