Graduate Degrees in the Department of Earth & Environment

Graduate Degree Programs

- Ph.D. in Earth Systems Science with Subplans
  - Geosciences
  - Natural Resource Science & Management
- M.S. in Geosciences
- M.S. in Environmental Studies
- Prof. Science Master’s in Environmental Policy & Management

Geosciences (Geosciences Ph.D. subplan, and the M.S. in Geosciences) research includes atmospheric sciences including hurricanes, geochemistry, geographic information systems, hydrology, igneous petrology, micropaleontology, stratigraphy, structural geology, and tectonics. Research projects are based in South Florida and the Everglades, the Caribbean and Latin America, as well as other international sites. Nineteen faculty in the department serve as geosciences Advisors, and many affiliated researchers serve on students’ committees.

Environmental Research (Natural Resource Science and Management Ph.D. subplan, and the M.S. in Environmental Studies) addresses land and aquatic science, conservation biology, natural resource management, environmental economics and policy and agroecology. Projects are based in the Everglades, local botanical institutions such as Fairchild Tropical Botanical Garden and the Kampong, and international sites. Fifteen departmental faculty and many affiliated faculty serve as student Advisors.

Professional Science Masters - Environmental Policy and Management (PSM-EPM) is a degree structured for professionals who want to enhance their knowledge and skill sets in EPM. This 16-month degree program requires 30 credits of coursework-conveniently offered on weekends and in the evenings-and completion of a six-credit internship or practicum.

Graduate students are supported by assistantships for research (RAs) or teaching (TAs, PhD program only) that provide a stipend and waiver of tuition. Details at: http://earthenvironment.fiu.edu/programs/graduate/

Application deadlines are Feb. 1 to begin in the Fall term and Sept. 1 to begin in the Spring term.

Graduate Program Directors:
Prof. Assefa Melesse – GPD for Ph.D. in Earth Systems Science (Geosciences or Natural Resource Science & Management subplan), M.S. in Geosciences, and M.S. in Environmental Studies. melessea@fiu.edu.

Prof. Krish Jayachandran – GPD for Professional Science Master’s in Environmental Policy and Management. jayachan@fiu.edu.

We offer graduate students:

- research in the geosciences, natural resource management, and environmental studies and policy
- advising, mentoring and teaching by internationally recognized faculty
- facilities for geoscientific and environmental investigation
- field and lab opportunities for research and coursework

Graduate research opportunities in geology, atmospheric sciences, and environmental science, policy & management

http://earthenvironment.fiu.edu/
Faculty, Students and Research

FIU is situated near the Everglades, Atlantic Ocean, Gulf of Mexico, the Caribbean and Latin America – diverse settings for geological, meteorological and environmental research. Twenty-eight faculty serve as Advisors to about 90 grad students in the Earth Systems Science Ph.D., Geosciences M.S., and M.S. Environmental Studies programs. The department and associated university research centers support outstanding research facilities used in graduate research and training in the laboratory and field.

Research in the Geosciences

- **Atmospheric Sciences**
  Researchers focus on hurricane dynamics, hurricane impacts, hurricane boundary layer turbulence structures, atmospheric convection, atmospheric boundary layer and clouds, and cloud-climate feedbacks. Primary faculty: Burgman, Jiang, Willoughby, Zhu.

- **Hydrogeophysics/Remote Sensing**
  Geophysical investigative techniques using gravity, magnetism, seismic reflection and refraction, earthquake seismology, thermal properties and satellite imagery. Primary faculty: Melesse, Whitman, Wdowinski, Jenkins.

- **Hydrogeology/Geochemistry**
  Field and modeling approaches to groundwater flow and solute fluxes in the subsurface and near-subsurface environments, in coastal and inland settings. Primary faculty: Anderson, Melesse, Price, Sukop, Whitman.

- **Igneous Petrology/Geochemistry**
  Research problems in petrology/geochemistry of igneous and metamorphic rocks with reference to their origin and processes, and of sedimentary rocks with reference to surface processes. Primary faculty: Anderson, Haggerty, Macfarlane, Srimal.

- **Micropaleontology/Stratigraphy**
  Micropaleontology and sedimentary petrology applied to paleobiology (evolution, paleobiogeography), paleoenvironments, paleoceanography, sequence stratigraphy, cyclic stratigraphy, biostratigraphy, and microfacies analysis. Primary faculty: Collins, Maurrasse.

- **Structural Geology/ Tectonics**
  Analysis of geologic deformation based upon the principles of mechanics and utilizing research data from laboratory and field investigations of folding, fabrics, fracture, and faulting. Primary faculty: Draper, Whitman.

Financial support for faculty and student research typically comes from NSF, NASA, IODP, USGS, DOE, Everglades National Park, USDA, South Florida Water Management District, Everglades Foundation, and the American Chemical Society. Teaching assistantships, Graduate assistantships and Fellowships are available for PhD students on a competitive basis.

Research in Environmental Science & Policy

- **Land and Aquatic System Science**
  Management of environmental problems and sustainable use of land and aquatic resources; understanding and quantification of fundamental physical, chemical, and biological processes operating on land, and in water and soil. Primary faculty: Jayachandran, Leatherman, Melesse, Rand, Rehage, E. Anderson, Ross, Scinto.

- **Natural Resource Management**

- **Environmental Economics and Policy**
  Analysis of policy effectiveness in managing environmental pollution, sustainable development, energy resources, climate change, food and agriculture, community forests, and conservation programs. Research methods in ecosystem service valuation, economic modeling, and ethnographic and other behavioral analyses. Primary faculty: Bhat, Bray, Heinen, Mozumder.
